Tender Solutions

Tender Solutions
Handling made simple !

With many boat Owners requesting larger tenders the handling becomes more complicated– hence Tender Solutions, our new division.

From a small dinghy ramp to mount on a bathing platform up to large and complex carriage and crane systems we will have the answer.

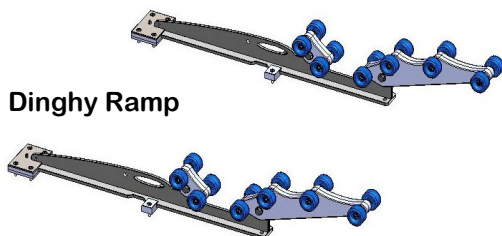

Removable platform mount jet ski turntables, winches, chock systems, all can be bespoke manufactured alongside our standard range in mirror polished stainless steel and powder coated aluminium.

STAINLESS STEEL YACHT LOGOS

With an integral design facility and water jet cutting we are ideally placed to make your boat names and logos from mirror polished stainless steel. Water jet cutting, unlike laser, being a cold process does not affect the cut edge of the metal, ensuring that over the long term the letters will not bleed any corrosion.

We can also supply these letters with LED backlighting, mounted into acrylic, in many single colours or even with a colour changing option to suite your mood !

Email us a drawing of what you require for a fast quotation

Custom Wakeboard Arch

FABRICATIONS

We manufacture a whole range of bespoke fabrications in stainless steel, duplex, titanium, aluminium, brass and copper.

Our Oval 316 Tube is world renowned and used on many superyachts.

Our skilled polishers create the highest quality mirror finishes.

We have an in-house Solidworks/ AutoCAD design department and we are very keen to have an opportunity to quote on your requirements.

We have waterjet cutting, (up to 80mm thick in stainless), CNC lathe and mill, sheet shearing and folding and tube bending equipment to create your parts, quickly and accurately.

Cinzano Offshore Powerboat

Simon Wood Power, our MD, races Cinzano with Markus Hendricks and Eric Smillie.

In 2011 they won the Marathon World Cup, The Harmsworth Trophy and the British National Championship. For 2012 they will be entering the Round Britain Race in June.

Cinzano is just under 40ft, (13M), long, powered by two V10 8.2 litre Ilmor petrol engines of 1450 HP, with a top speed of 103MPH, (170 KPH).

Stainless Steel Sea Strainer

Engine Braces/ Sea Strainers

We have developed a stainless steel engine foot brace specifically for engines based on the Toyota 6 cylinder diesel block such as Yanmar 315,380,440,480 6L Series. It eliminates the possibility of the feet pulling out of the block in very rough seas, or arduous conditions and thus irreparably damaging the block.

Our stainless sea strainers, as used by many successful offshore powerboat race teams, including Cinzano, feature a patented quick release top to enable fast removal of debris from the filter basket.

A Selection of our mirror polished stainless fabrications

FUEL, WATER, WASTE TANKS

We are the original equipment manufacturers of most of the fuel, water and waste tanks used by Sunseeker and many other OEM boatbuilders. We already supply many RIB manufacturers including Pascoe, Revenger, Hunton and MST. We supply tanks and other stainless and aluminium fabrications to the RNLI.

We have now manufactured over 33,000 tanks, some of these tanks are now 20 or more years old and show little signs of corrosion or wear and tear, so we are ideally placed to manufacture tanks for your boats.

We can offer advantageous builder/dealer pricing, technical assistance and rapid turnaround. All our tanks are individually pressure tested, certified and carry our two year warranty on materials and workmanship; and are backed with £10M product liability insurance specifically for fuel tanks. Can your tank manufacturer offer all these benefits?

Do call us on 01202 749907.
